Wed, 16 Jan 2019 22:08:00 GMT metal catalyzed asymmetric aldol reactions pdf - The aldol reaction is a means of forming carbon-carbon bonds in organic chemistry. Discovered independently by the Russian chemist Alexander Borodin in 1869 and by the French chemist Charles-Adolphe Wurtz in 1872, the reaction combines two carbonyl compounds (the original experiments used aldehydes) to form a new  $\beta$ -hydroxy carbonyl compound.
