The process: Many years, many failures, much uncertainty. Most often, the development of a new medicine starts when basic scientists learn of a biological target (e.g., a receptor, enzyme, protein, gene, etc.) that is involved in a biological process thought to be dysfunctional in patients with a disease

such as Alzheimer's disease (AD). Mon, 14 Jan 2019 19:26:00 GMT Drug discovery and development: Role of basic biological ... - Neurological Science. Neuroscience is the scientific study of the nervous system. It is a branch of biology that deals with the anatomy, biochemistry, molecular biology, and physiology of neurons and neural circuits.
