respiratory distress syndrome (ARDS) is the sudden failure of the lungs

to move sufficient oxygen into the blood. Without adequate oxygen supply

organ function may be seriously compromised. ARDS may be caused by

sepsis, trauma, pulmonary infection, blood transfusions, smoke

inhalation, narcotics, aspiration and shock. As many as 30% of cases are

fatal. Tue, 15 Jan 2019 22:52:00 GMT Respiratory Disorders Practice Test -

Review: Respiratory System Structures Page 13. Summary

“ The respiratory system consists of the nose, pharynx, larynx, trachea, bronchi,

and lungs. “ The visceral pleura covers the surface of the lungs. The parietal

pleura covers the mediastinum and the diaphragm, and lines the thoracic wall. “

The lungs contain the bronchial tree, the branching airways from the primary bronchi
