While a total synthesis of the natural product 1 was not complete, a rather straightforward synthesis of 8, the methyl ester of 1, was achieved. Thus, 10undecen-1-01 (2) was converted to the bromide and the olefin transformed into a secondary alcohol via an oxymercuration-reduction sequence. This secondary alcohol was then protected as the THP ether to give 57% yield of 3. Conversion of 3 to the corresponding ...
