

September 7th - 11th

The 43rd Annual

ARIZONA Fire School 2016

The **Arizona State Fire School** is brought to you through the volunteer efforts and commitment of the Arizona State Fire Training Committee. Since the first fire school in 1973 the goal has been to improve the safety of Arizona's firefighters by offering high quality training. Well trained and knowledgeable firefighters can better protect the citizens of their respective communities from the many hazards of daily life.

Each year the Fire School continues the work of the State Training Committee in meeting this goal. From Basic Firefighter Skills, to Fire Service Leadership, to Fire ground Operations, the Fire School provides education in the skills and knowledge a modern firefighter needs to be effective while remaining safe.

Fire School brings the Arizona Fire Service together, not only to educate but to celebrate our history and recognize our members, past and present, whose work and vision have created today's fire service.

Arizona Firefighters and families,

This year we are celebrating 43 years at the annual Arizona State Fire School. We are very excited to welcome you either as a long time continued supporter or if this is your first time. We know time away from your family, community and work for some of you is important so we strive for opportunity to help you become even better and safer at what we in the fire service all do.

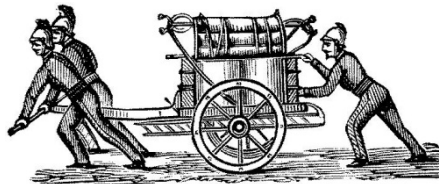

The Mission and Purpose of the Fire Service have clearly indicated the firm belief in the accepted three primary functions of the Fire Service. They are Life Safety, Incident Stabilization and Property Conservation. These three values speak to our Mission and Purpose on the fire ground. In all other All-Risk functions we have accepted as part of our growing responsibility the front line defense and the protectors of our communities.

Many of you have attended the State Fire School in the past and we hope you will return to experience one of the 30 plus classes, many nightly events and one of the best training experiences available at any venue. With the addition of new classes and the continuation of the most important basic skills classes, we have tried to offer every member of the fire service an applicable learning experience.

The all-volunteer training committee has worked very hard to continue the reputation that has been handed down to us. Like our predecessors, we have dedicated our efforts to providing the highest quality training at the most affordable cost. With the help of all our state wide partners, the 40 plus members of the State Fire Training Committee and all of you, we thank everyone who supports this endeavor. It is our goal to help provide more knowledge and resources to help you be safe and successful. One of the added values of Fire School is the networking you will obtain while attending class. You will find many peers as resources as you join in camaraderie and the brotherhood of building your professional network.

Make Everyday a Training Day so Everyone Goes Home Every Day!

Clay Wood
Arizona State Fire Training Committee Chairman
Deputy Chief – Timber Mesa Fire & Medical Department

43rd Annual Arizona State Fire School

September 7-11, 2016
Phoenix Marriott Mesa Hotel
200 N. Centennial Way, Mesa, AZ 85201

Schedule of Events

Wednesday, September 7

8:00 am	Fire Instructor I & Fire Inspector I workshops begin (see class description section for information)
2:00 - 5:00 pm	Fire School check in <i>Mesa Convention Center Lobby</i>

Thursday, September 8

7:00 am	Fire School check in
9:00 am	Opening Ceremonies <i>Mesa Convention Center, Main Hall</i> <ul style="list-style-type: none"> • Presentation of Colors • Invocation • Welcome and Opening Comments • Foundation Information • Keynote Speaker: Richard B. Gasaway -see page 12 • Award Presentation • Closing Comments
11:30 am	Lunch (on your own)
1:30 pm	Workshops begin
5:30 pm	Workshops adjourn
5:30 pm	Social networking – Marriott hotel lobby

Friday, September 9

8:00 am	Workshops begin
12:00 pm	Lunch (on your own)
1:30 pm	Workshops continue
5:30 pm	Workshops adjourn
6:00 pm	Fire Apparatus Display & Custom Car Show

Saturday, September 10

8:00 am	Workshops begin
12:00 pm	Lunch (on your own)
1:30 pm	Workshops continue
5:30 pm	Workshops adjourn
6:00 pm	Raffle drawing <i>Ballroom D, Phoenix Marriott Mesa Hotel</i>

Sunday, September 11

8:00 am	Workshops begin
12:00 pm	Workshops adjourn
1:00 - 2:30 pm	State testing for Instructor and Inspector Programs

WORKSHOP LISTING

SKILLS TRAINING

- 1 Basic Firefighter Skills
- 2 Confined Space Rescue
- 3 Vehicle Stabilization & Patient Extrication
- 4 Emergency Vehicle Driving
- 5 Emergency Vehicle Driving Instructor, Train-the-Trainer
- 6 Fire Ground Tactics & Procedures
- 7 Asymmetric Threats: Challenging Active Violence Response Strategies
- 8 Fire Pumps: Theory, Operation & Maintenance
- 9 Small & Rural Fire Department Strategies & Resource Management
- 10 Introduction to Fire Hydraulics
- 11 Ladder Truck Company Functions & Operations
- 12 Live Fire Training-Basic
- 13 Live Fire Training-Intermediate
- 14 Rope Rescue I
- 15 Rope Rescue II
- 16 Smoke Plus
- 17 Industrial Fire Brigade
- 18 Modern Fire Attack for Initial Company Operations
- 19 Firefighter Survival

FIRE PREVENTION & INVESTIGATION

- 20 Fire Detection & Protection Systems
- 21 Fire Origin & Cause for First Responders
- 22 Fire Inspector I (NFPA 1031) – (Starts Wednesday)
- 23 Fire & Life Safety Educator I

FIRE LEADERSHIP

- 24 Fire Instructor I (NFPA 1041) – (Starts Wednesday)
- 25 Fire Instructor II (NFPA 1041)
- 26 Incident Safety Officer (ISO)
- 27 Leadership I & II
- 28 Company Officer Leadership
- 29 Executive Fire Officer Leadership
- 30 Rural/Volunteer Fire Department Management
- 31 Introduction to Safe & Effective Fire Training (NFPA 1403 Compliant)
- 32 Adaptive Leadership & Leadership Lessons of Gettysburg
- 33 Health & Safety Officer (HSO)
- 34 Firefighter Wellness for the Company Officer

WORKSHOP DESCRIPTIONS

*Class locations will be available upon Fire School check in at the Mesa Convention Center next to the hotel.

SKILLS TRAINING

1. BASIC FIREFIGHTER SKILLS

This course is designed to provide knowledge at the awareness level to the inexperienced firefighter. Using classroom and hands-on training, the student will be exposed to firefighter safety and training standards, SCBA use, hose, ladders, ropes and knots, fire streams and firefighting tools.

Special Notice: *The first class meeting will be held on Thursday afternoon in the Main Hall of the Mesa Community Center. The remainder of the workshop will be held at an offsite location. You must provide your own transportation or carpool.*

REQUIRED EQUIPMENT: Full protective equipment and SCBA (NFPA compliant/serviceable condition), No facial hair

2. CONFINED SPACE RESCUE I

Lab Fee: \$20

This course will provide an overview of OSHA law (29CFR 1910.146), monitoring atmospheres and ventilation techniques, as they apply to first responders. Activities will include hands-on drills for monitoring air atmospheres, ventilation activities and use of specialized technical rescue equipment.

Actual personnel rescues will be conducted.

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

REQUIRED EQUIPMENT: You must bring your own gloves and knee pads.

3. VEHICLE STABILIZATION & PATIENT EXTRICATION

Lab Fee: \$30

This course is designed to challenge firefighters of all experience levels in basic and advanced vehicle stabilization and patient extrication techniques. The curriculum will prepare rescuers to successfully manage vehicle incidents safely and proficiently. Topics include incident size-up, scene hazard management, vehicle stabilization, patient access and management, extrication techniques, and new car technology. Hand, power, and hydraulic tools will be utilized. Hands-on practice every day is emphasized throughout the course with basic and advanced pits to develop all skill levels.

This is a very physically demanding course and weather conditions are typically hot.

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

REQUIRED EQUIPMENT: Full turnouts (NFPA compliant / serviceable condition), steel toe bunker boots or shoes, helmets, gloves and safety glasses

4. EMERGENCY VEHICLE DRIVING

This course addresses the problems of emergency vehicle operations. Topics include: legal aspects, accident avoidance and mechanical limitations. A

hands-on, skill-training course will be utilized. Students will be trained and drive a designed cone course and will have the opportunity to work on a driving simulator. This class is for both new and veteran apparatus drivers.

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

REQUIRED EQUIPMENT: You must have a valid Arizona Class D Operators driver's license.

5. EMERGENCY VEHICLE DRIVING INSTRUCTOR, TRAIN-THE-TRAINER

This course will provide necessary information and training to those persons responsible for conducting emergency vehicle driver training. Topics covered include procedures for selecting driver candidates, familiarization with applicable NFPA and other standards associated with driving emergency vehicles, developing a driver/operator certification program, driver evaluation techniques for cone course and over-the-road testing, and developing testing mechanisms. Students will also be given hands-on instruction for driver evaluation on both a cone and a road course. All necessary classroom instruction for driver candidates will also be covered.

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

PREREQUISITES:

- Must have completed a recognized apparatus driver/operator program
- Must be responsible for driver training for their agency
- Must possess a valid Arizona driver's license.

6. FIREGROUND TACTICS & PROCEDURES

This course provides the Fire Officer or prospective Fire Officer with the training to develop strategies to manage individual fires and emergencies. The course is fast paced, visual and applicable to your daily emergency responses. Command procedures dealing with the initial response, rescue techniques, fire control, ventilation, property conservation, urban interface and special tactical operations will be covered in-depth.

7. ASYMMETRIC THREATS: CHALLENGING ACTIVE VIOLENCE RESPONSE STRATEGIES

LAB FEE: \$25

Active violence events have resulted in numerous civilian casualties and captured the attention of the nation. These horrific and calculated acts have dramatically impacted countless individuals and communities by instilling fear that such events can unpredictably occur in urban, suburban, rural and metropolitan areas. Despite evolving threats, many public safety organizations throughout the country have yet to develop response paradigms to meet these challenges. Instructed by members of the Law Enforcement, Fire Service and EMS Communities, this highly interactive, 4-day course will deconstruct the nature of these threats as well as offer substantive, integrated point-of-wound care instruction specifically focused on dynamic active violence, all-hazards and/or explosive environments.

Target Audience: *This course is specifically targeted for representatives of public safety organizations who want to share and develop strategies for combating the active shooter and mass casualty incident problem facing our communities*

Special Notice: *Participants interested in attending this course MUST pre-enroll by email prior to online registration. Please email your contact information, to include name, department or agency, email address, to: rtf@flytucson.com. On August 1, 2016, official notifications will be made and those selected may register online at that time.*

Note for Firefighters: *Since it is not guaranteed that you will be selected for this course, fire service personnel should register for another class choice if any other classes are of interest. If selected for this class, your registration will be updated after confirming with the registrant.*

8. FIRE PUMPS: THEORY, OPERATION & MAINTENANCE

This class will provide firefighters the basics of fire pump operation and maintenance. Topics covered include: pump components, pump operation, pump maintenance and pump testing. This class will include field operations as well as classroom hands-on exercises. Videos, a cutaway pump, fire apparatus, pump components and handouts will be utilized in this class. Be prepared to get dirty.

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

REQUIRED EQUIPMENT: **Work clothes, gloves and eye protection.**

9. SMALL & RURAL FIRE DEPARTMENT STRATEGIES & RESOURCE MANAGEMENT

The purpose of this course is to provide small and rural departments with some clear strategies that promote safety and the understanding of national laws, standards, and best practices. It will help participants with resource management, developing plans and implementation techniques to use in their departments.

Target Audience: *This course targets small and rural organizations. This course is about planning and strategies for managing the small or rural fire department. This class will benefit the senior or lead firefighter through the fire chief.*

RECOMMENDED MATERIAL: It is recommended that participants bring a copy of their SOG's, SOP's, rules and regulations, or written policies, no matter how old or incomplete they are. Bring an open mind, positive attitude, and lots of energy.

10. INTRODUCTION TO FIRE HYDRAULICS

This course is designed to provide firefighters and engineers with the working knowledge of fire ground hydraulics. The course utilizes classroom and field pumping exercises and instruction on basic flow and friction loss requirements for common hose evolutions. Tricks-of-the-trade formulas are utilized for easy retention.

REQUIRED EQUIPMENT: **Saturday only - Helmet, leather gloves, steel-toed boots (leather or rubber)**

11. LADDER TRUCK COMPANY FUNCTIONS & OPERATIONS

LAB FEE: \$50

This course provides all firefighters a comprehensive understanding of ladder truck company functions and operations on the fire ground. Your department does not need to have a "truck company" for you to benefit from this course. Fire Ground skills covered include ventilation size-up, vertical ventilation techniques, positive pressure ventilation techniques, roof systems; including truss types and their associated hazards, forcible entry, and safe operating procedures on residential and commercial roofs. Field exercises include hands-on training with various hand and power tools.

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

PREREQUISITE: **Arizona Firefighter I & II certification or IFSAC Firefighter I & II.**

REQUIRED EQUIPMENT: **Full protective equipment and SCBA (NFPA compliant / serviceable condition), No facial hair. Recommended: 2-4 gigabyte thumb drive.**

12. LIVE FIRE TRAINING - BASIC

LAB FEE: \$30

This course is for the new firefighter, or firefighter with limited experience, and is designed to enhance the new firefighter's knowledge and build on basic firefighting skills. The class will focus on activities necessary to operate safely in interior live fire conditions. Students will improve skills in PPE/SCBA donning/doffing, fire ground safety, and fire behavior under live interior structure fire conditions. Under close supervision, students will operate as fire companies practicing search and rescue, fire ground safety, and fire attack and support activities. Participants must meet specific performance criteria in order to receive a Certificate of Completion.

Target Audience: *New firefighters who have had limited live fire experience and firefighters with live fire experience who want to reinforce basic skills.*

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

PREREQUISITE: Completion of ONE of the following: Arizona Fire School "Basic Fire Fighter Skills" course, Arizona Firefighter I & II certification or IFSAC Firefighter I & II certification.

REQUIRED EQUIPMENT: Full protective equipment and SCBA (NFPA compliant / serviceable condition), No facial hair.

13. LIVE FIRE TRAINING - INTERMEDIATE

LAB FEE: \$30

This course is designed to enhance and build upon the **experienced** firefighter's essential techniques of fire fighting. Safe fire ground operations and live fire training under controlled conditions will

be utilized. Instruction will focus on structural, fixed facility (flammable liquid/gas) installations, flashover/fire behavior, and vehicle fires. Participants must meet specific performance criteria to receive a Certificate of Completion.

Target Audience: *Firefighters with past live fire training and experience operating on the fire ground. This is not an introductory course.*

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

PREREQUISITE: Completion of ONE of the following: Arizona Fire School "Live Fire Training - Basic" course, Arizona Firefighter I & II certification or IFSAC Firefighter I & II certification.

REQUIRED EQUIPMENT: Full protective equipment and SCBA (NFPA compliant / serviceable condition), No facial hair.

14. ROPE RESCUE I

LAB FEE: \$25

This course will introduce the student to the operational level of rope rescue. Students will study the differences between technical and non-technical litter evacuations. Students will be introduced to basic knot craft, anchor systems, mechanical advantages, belay techniques, rope and allied equipment necessary to conduct rope rescue operations. This class is a required prerequisite for the technical rescue program.

Special Notice: *This workshop requires travel to an off-site location. You must provide your own transportation or carpool.*

REQUIRED EQUIPMENT: Gloves, boots, helmet w/chin strap, seat harness (optional).

15. ROPE RESCUE II

LAB FEE: \$25

This course is designed to take the student from Rope I and introduce them to the vertical environment. Students will participate in skills in the high angle environment including: ascending and descending fixed ropes, self-rescue skills, rescuer based and team based rescue scenarios.

Special Notice: *This workshop requires travel to an off-site location. You must provide your own transportation or carpool.*

PREREQUISITE: Rope Rescue I

REQUIRED EQUIPMENT: Leather gloves, appropriate hiking/climbing footwear, safety glasses, ANSI Z98.1 rated helmet, hydration bottle or system, outerwear suitable for climate. Class III harness (optional).

16. SMOKE PLUS

LAB FEE: \$30

This class is designed to enhance the firefighters awareness to potential fire ground factors that have historically contributed to or resulted in firefighter injuries or deaths. The class is made up of both cognitive and manipulative skills. Classroom time will be spent reviewing building construction, local incident near misses, reading smoke and the International Association of Fire Chiefs (IAFC) Sixteen Firefighter Life Safety Initiatives. The class will also participate in a flashover chamber to better help understand smoke behavior and its characteristics. The class will also practice various rescue skills.

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

PREREQUISITE: Completion of ONE of the following: Arizona Fire School "Live Fire Training - Basic" course, Arizona Firefighter I & II certification or IFSAC Firefighter I & II certification.

REQUIRED EQUIPMENT: Full protective equipment and SCBA (NFPA compliant / serviceable condition), No facial hair.

17. INDUSTRIAL FIRE BRIGADE

This program is designed for newer Members of an Industrial Fire Brigade. The program will discuss materials from NFPA 600, Standard on Industrial Fire Brigades and NFPA 1081, Standard for Industrial Fire Brigade Member Qualifications, as well as general firefighting topics, including Fire Behavior, Response and Size-up and Fire Detection and Suppression Systems. There will be discussion of the structure and organization of Emergency Response Teams, pre-incident planning and training considerations of the Industrial Fire Brigade, and attendees should come prepared to discuss their Industrial Fire Brigade program.

In addition to the Industrial Fire Brigade, there will be basic presentation of Hazardous Materials, Confined Space, Technical Rescue and the delivery of Emergency Medical Services in an Industrial setting.

18. MODERN FIRE ATTACK FOR INITIAL COMPANY OPERATIONS

Modern Fire Attack for Initial Company Operations is a review of the UL/NIST studies and how modern fire behavior/dynamics affects initial company operations. The course will consist of classroom lecture reviewing important information that has come from the UL/NIST studies and how SLICE-RS can be implemented into modern fire attack models. The course will also include several practical observation drills to review the effects of the flow path and the importance of controlling it. These observation drills will include the burning of a dollhouse and a flow path drill conducted within a Phase I Flashover Simulator.

19. FIREFIGHTER SURVIVAL

This course is designed to better prepare the firefighter of all levels with the tools and skills necessary to help them survive catastrophic events on the fire ground. The majority of the curriculum will include hands on training in techniques as forcible egress,

entanglement procedures, low profile techniques to escape through restricted openings, SCBA familiarization, escapes from upper floor windows and more. This training will be physically and mentally demanding. The class is designed for both new and experienced firefighters.

Special Notice: *This workshop will meet at an offsite location. You must provide your own transportation or carpool.*

PREREQUISITE: *Completion of ONE of the following: Arizona Fire School "Basic Fire Fighter Skills" course, Arizona Firefighter I & II certification or IFSAC Accredited Firefighter I & II certification.*

REQUIRED EQUIPMENT: *Full Protective equipment and SCBA (NFPA Compliant/serviceable condition)*

FIRE PREVENTION & INVESTIGATION

20. FIRE DETECTION & PROTECTION SYSTEMS

This class will cover most types of active fire detection and suppression systems. This class is inter-active and will incorporate field trips to cover both the "Detection and Protection" systems. This class is designed for the company officer and new inspectors.

21. FIRE ORIGIN & CAUSE FOR FIRST RESPONDERS

This course addresses the basic skills needed to conduct initial fire origin and cause determinations. Upon successful completion of this course, students will be better prepared to make observations and gather information that will assist in identifying area(s) of origin, and assess the need for additional assistance and probable cause of a fire. Subjects include, but are not limited to, behavior of fire, determining area of origin, accidental and incendiary fire examinations, motives of the fire-setter, vehicle fires, legal aspects (court testimony), and handling/preservation of evidence.

Target Audience: This class is intended for all first responders whose departments do not have a formalized fire investigation unit or responsibility, and are interested in pursuing education in origin and cause investigations.

22. FIRE INSPECTOR I (NFPA 1031)

Fundamentals of fire prevention includes: techniques, procedures, regulation, and enforcement. Also includes discussion of hazards in ordinary and special occupancies. Format for this course is lecture and class discussion.

Disclaimer Statement

This course is geared toward the career Fire Inspector or Firefighter, and is not intended for entry level personnel. The written test is for state certification, but the certification process is not currently IFSAC accredited. If the certification process becomes IFSAC accredited at a later date, it may be possible to earn a certification with an IFSAC seal provided that certain additional requirements and skills testing are completed. Any additional requirements are the responsibility of the participant.

IMPORTANT NOTICE: This class will start Wednesday, September 7th at 8:00am. The class will be located in the Phoenix Marriott Mesa Hotel (Ballrooms). Participants will check in at their classroom to receive their Fire School information. Participants must attend ALL classroom sessions to be eligible to test for certification.

REQUIRED TEXT: Participants are required to obtain a copy of the IFSTA Fire Inspection and Code Enforcement manual, 7th Edition, and begin reading prior to class. The workbook is not required. The text may be obtained through the Fire Service Bookstore at www.fireservicebooks.com OR if you prefer a digital copy of class handouts please contact Cina Sunderhaus at marcina.sunderhaus@chandleraz.gov.

CERTIFICATION EXAM: The state certification exam will be administered on the final day of class. Participants must pass the certification exam to become state certified as Fire Inspector I. A \$50 testing fee is included in the total registration fee of \$175. Certification testing fees are refundable if a participant does not complete all classroom requirements and is not eligible to test. Refund requests must be made in

writing. **Note:** If the fee is refunded, the participant must retake the entire program to be eligible to test. See refund policy in the General Information section.

23. FIRE & LIFE SAFETY EDUCATOR I

Fire & Life Safety Educator I introduces the student to the basics of teaching fire and life safety to a variety of audiences. This class is interactive and creative! Subjects include how to instruct young children, elementary and secondary age audiences, and older adults as well as the general population. Students will learn about various teaching methods and how to select appropriate teaching materials. Each student will be required to make a 10 – 12 minute presentation to the class on a selected life safety topic.

The final presentation is a major component of the class. It represents a culmination of the knowledge and ideas gained during the course and will be graded accordingly. Class members and instructors will offer suggestions on additions or improvements in a safe environment with guidance from the instructor. Students should consider a life safety topic before attending class – as the class progresses it will be easier to consider teaching methods, props, handouts, etc., that can be used for the presentation. All students are required to do a presentation as a part of the course completion.

REQUIRED TEXT: Each student is required to bring a copy of IFSTA Fire & Life Safety Educator training manual, 3rd edition. Abbreviated student manuals will be provided.

FIRE LEADERSHIP

24. FIRE INSTRUCTOR I (NFPA 1041)

This course is designed to meet the requirements of NFPA 1041, Level I and is one of the qualifications required to become a fire service instructor for the State of Arizona. The fire service instructor will be able to demonstrate the knowledge of and the ability to present instruction from prepared material.

IMPORTANT NOTICE: This class will start Wednesday, September 7th at 8:00am. The class will be located in the Phoenix Marriott Mesa Hotel

(Ballrooms). Students will check in at their classroom to receive their Fire School information. Students must attend ALL classroom sessions to be eligible to test for certification.

REQUIRED TEXT: Students are required to obtain a copy of the IFSTA, Fire & Emergency Services Instructor manual, 8th Edition, and begin reading at least a week prior to class. The text may be obtained through the Fire Service Bookstore at www.fireservicebooks.com.

CERTIFICATION EXAM: The state certification exam will be administered on the final day of class. Individuals must pass the certification exam to become state certified as Fire Instructor I. **A \$50 testing fee is included in the total registration fee of \$175.** Certification testing fees are refundable if a student does not complete all classroom requirements and is not eligible to test. Refund requests must be made in writing. **Note:** If the fee is refunded, the student must retake the entire program to be eligible to test. See refund policy in the General Information section.

25. FIRE INSTRUCTOR II (NFPA 1041)

This course is designed to meet the requirements of NFPA 1041, Level II and is the second course in the Fire Instructor competency series. Instructor II builds on the fire instructor's basic knowledge and places special emphasis on class and evaluation design strategies and student objective and lesson plan writing skills. Students will review the lesson plan format from Instructor I and then design and write their own student objectives and lesson plans for a one-hour fire department-related class. On the last day of class, students will present a five-minute segment from their lesson plan to the Instructor II class using audio/visual aids. Students must come to class prepared with a topic, an outline, and all resources needed to create a lesson plan and instruct a portion of the lesson plan.

PREREQUISITE: Fire Instructor I Certification, NFPA 1041

REQUIRED TEXT: Students are required to obtain a copy of the IFSTA, Fire & Emergency Services Instructor manual, 8th Edition, and begin reading at least a week prior to class. The text may be obtained through the Fire Service Bookstore at www.fireservicebooks.com.

CERTIFICATION EXAM: The state certification exam will be administered on the final day of class. Individuals must pass the certification exam to become

state certified as Fire Instructor II. **A \$50 testing fee is included in the total registration fee of \$175.** Certification testing fees are refundable if a student does not complete all classroom requirements and is not eligible to test. Refund requests must be made in writing. **Note:** If the fee is refunded, the student must retake the entire program to be eligible to test. See refund policy in the General Information section.

26. INCIDENT SAFETY OFFICER

This course examines the Safety Officer's role in emergency response situations. The main theme is a focus on operations within an incident command system as a safety officer. The participant will be able to identify and analyze concerns as they relate to hazard scene evaluations, and communicate recommended solutions to the command authority. The general audience for ISO is individuals who have a Safety Officer responsibility at emergency operation situations. Persons attending this course should have a working knowledge of the ICS as taught by the National Fire Academy, building construction principles, hazardous materials management, applicable NFPA guidelines and federal regulations.

RECOMMENDED TEXT: Current recommended text for this class is the "Fire Department Incident Safety Officer"; 3rd Edition; David Dodson. The text may be obtained through the Fire Service Bookstore at: www.fireservicebooks.com.

Upon completion of this class, students will have met NFPA 1521, 2008 Edition, Chapter 4 Section 4.5.1 requirements and will be eligible to receive a "Certificate of Attendance" from the National Fire Academy.

TEST OPTION: Information about the Fire Department Safety Officer Association (FDSOA) exam, accredited through the National Board for Fire Service Professional Qualifications (Pro Board) will be explained during the first day of class. Information on where and when the FDSOA is conducting exams will also be shared during class. Students can visit the FDSOA website <http://www.fdssoa.org/> to learn more about how to apply for the exam and future dates for testing. Blank application forms will be provided in class and can also be downloaded from the FDSOA website. The exam fee is \$95 for FDSOA members and \$195 for non-members. For additional information you

can contact Linda Stone (248) 880-1864.

27. LEADERSHIP I & II

Leadership I - Strategies for Company Success: This course presents the company officer with the basic leadership skills and tools needed to perform effectively in the fire service environment. The course includes techniques and approaches to problem-solving, ways to identify and assess the needs of the company officer's subordinates, methods for running meetings effectively in the fire service environment, and decision making skills for the company officer.

Leadership II – Strategies for Personal Success: This course provides the company officer with the basic leadership skills and tools needed to perform effectively in the fire service environment. The course addresses ethics, use and abuse of power at the company officer level, creativity in the fire service environment, and management of the multiple roles of the company officer.

28. COMPANY OFFICER LEADERSHIP

This course provides a focused discussion on the professional behaviors and broad perspectives guiding the effective company officer. Company officers fulfill the most critical role in the fire service when it comes to delivering customer service. Many company officers and departments focus their training efforts on the strategies and tactics of operating on the fire ground this course focuses on the other 95% of the company officers role. The participant will be exposed to: Fire Service ethics, personnel management, customer service, political reality, fire service leadership and crew management.

29. EXECUTIVE FIRE OFFICER LEADERSHIP

This course is designed to assist the participant in developing and refining command presence. The course will also address the chief officer role as public administrator. An emphasis will be placed on identifying the behaviors and actions expected of a chief officer. Major topic areas include: image, ethics, managing public funds, developing and maintaining successful relationships, inspiring excellence and avoiding self-destructive behavior.

30. RURAL/VOLUNTEER FIRE DEPARTMENT MANAGEMENT

This course presents many of the basic concepts that are needed to assist the smaller, rural fire departments in their efforts to deliver emergency services to their communities. The course utilizes student and instructor interaction in a classroom setting. Emphasis is placed on liability, SOP's, SOG's and budgets. These are practical, effective, economical and innovative concepts that have been introduced into the fire service to increase total operational efficiency. This course will be beneficial to the smaller department Chief Officers, Training Officers, Board Members and others in positions of authority. Participants should bring topics with them to class that they would like addressed during the class.

31. INTRODUCTION TO SAFE & EFFECTIVE FIRE TRAINING (NFPA 1403 COMPLIANT)

Do you know, understand and apply the consent standards that govern safe and effective fire training? Learn what you must do to keep your students safe and your agency out of the "headlines". This is a review of the consent standards that directly apply to fire service training, specifically in the area of live fire training.

Unfortunately, in some cases, "fire training out of control" has led to serious injuries and, tragically, the deaths of several firefighters, instructors and officers. In order to survive, firefighters must be able to think critically and clearly and solve problems quickly under extreme stress. This can be especially difficult in an actual fire. The overall goal of live fire training is to instill good habits

in students through repeated exposure. The program will take a look at what a typical live fire training session looks like according to NFPA 1403.

This class will include a very serious discussion for all fire instructors and fire officers on the good, the bad and the ugly issues, standards and latest facts related to live fire training.

32. ADAPTIVE LEADERSHIP & LEADERSHIP LESSONS OF GETTYSBURG

This class will offer invaluable insight to "Adaptive Leadership" using case studies, film, and group discussion examining the distinctions between technical and adaptive leadership. This course reinforces both CRM and the 16 LSI. Given both instructors experience and involvement in Professional Development this presentation should be an informative and insightful presentation regarding leadership when dealing with the unknowns, where there are no polices or procedures to follow!

In addition, the Leadership Lessons from Gettysburg contains timeless principles that are often overlooked by fire service members who are constantly seeking the latest and greatest new (leadership) concepts; often times not ever realizing that they are built upon and/or an adaptation of current tried and true management models. To illustrate and reinforce how management and leadership theories don't change, but build upon one another, the Battle of Gettysburg will be reviewed and examined throughout the presentation. Participants will come away with valuable management models and leadership principles, which they can immediately apply at home and work

33. HEALTH & SAFETY OFFICER

This course is designed to deliver the knowledge, skills and abilities for individuals that will be, or are currently filling the role of Health/Safety Officer. The course generally follows the Health/Safety Officer requirements as listed in NFPA 1521, Standard for Fire Department Safety Officer Professional Qualifications. Individuals completing the course will have a solid foundation for managing their district/department's occupational health and safety program

and is excellent preparation for those desiring to become FDSOA/ProBoard Accredited Health/Safety Officer certified.

RECOMMENDED PREREQUISITE: NFA or FDSOA Incident Safety Officer course.

TEST OPTION: Information about the Fire Department Safety Officer Association (FDSOA) exam, accredited through the National Board for Fire Service Professional Qualifications (Pro Board) will be explained during the first day of class. Information on where and when the FDSOA is conducting exams will also be shared during class. Students can visit the FDSOA website <http://www.fdsOA.org/> to learn more about how to apply for the exam and future dates for testing. Blank application forms will be provided in class and can also be downloaded from the

FDSOA website. The exam fee is \$95 for FDSOA members and \$195 for non-members. For additional information you can contact Linda Stone (248) 880-1864.

34. FIREFIGHTER WELLNESS FOR THE COMPANY OFFICER

The Firefighter Wellness for the Company Officer course will provide a baseline understanding of various components of wellness as it relates to the firefighter.

Company Officers attending this course will be equipped to:

- Identify concerns related to the firefighter's mental health

- Understand and explain the components of proper nutrition
- Identify the needs for maintaining and improving cardiovascular health and overall strength
- Understand body movements necessary for the job and identify correctable faulty movements
- Lead safe fitness programming during shift

This class will combine classroom learning with hands on lab experiences in the gym. Join us for the first ever class of its kind and learn how to care for your crew at a whole new level

SPECIAL PRESENTATIONS

DURING THE OPENING CEREMONIES ON THURSDAY, SEPTEMBER 8, 2016
(Some awards may not be presented each year)

Firefighter Memorial Service

Arizona's fallen firefighters will be honored at a Firefighter Memorial Service to be conducted during the Opening Ceremonies of the 43rd Annual Arizona State Fire School on Thursday, September 8, 2016 at 9:00am. The service will include a memorial bell ceremony conducted by personnel of the Mesa Fire and Medical Department Honor Guard & Pipes and Drums, along with other personnel from various fire departments in the State. The service will recognize all members who have served, including deaths outside of the line of duty and death after retirement.

Firefighter of the Year

United Fire Equipment will present the Firefighter of the Year Award during the Opening Ceremonies. The individual recipient is honored based on heroic achievements or contributions to life safety.

Arizona Fire Investigator of the Year

The Arizona Chapter, International Association of Arson Investigators will name the individual who has been nominated as a result of their exemplary skills in the field of Fire Investigation.

Arizona Fire & Life Safety Educator of the Year

Each year the Arizona Fire and Burn Educators Association selects a Fire and Life Safety Educator of the Year. The individual awarded this honor has made significant contributions to Fire and Life Safety Education, demonstrated outstanding work as an educator, has been successful in increasing public awareness about safety issues, serves as a positive role model in their community and exhibits a commitment to excellence in their educational efforts.

Arizona Fire Service Hall of Fame

The Arizona Fire Service Hall of Fame was created by the Arizona State Fire Training Committee to honor the men and women who have provided distinguished service to the Arizona fire service. The inductees are selected from nominations received statewide, from within the fire service and beyond. Inductees to the Hall of Fame will be announced and honored during the Opening Ceremonies.

Keynote Speaker

Richard B. Gasaway worked as a first responder in three public safety organizations including serving 22 years as a fire chief. After completing his distinguished 30-year career, Dr. Gasaway founded Situational Awareness Matters!, a consulting and teaching organization dedicated to improving how individuals, teams and organizations develop situational awareness as a foundation for improving workplace and personal safety. His company website, SAMatters.com, has been visited by over four million people from 156 countries.

As a professional speaker and author, Dr. Gasaway has contributed to more than 400 books, book chapters and journal articles on topics related to leadership, safety, situational awareness and high consequence decision making. His best-selling books, [Situational Awareness Matters Volumes 1 & 2](#), [Situational Awareness for Emergency Response](#), and [Fire ground Command Decision Making](#), serve as essential guides for helping individuals and teams develop and maintain situational awareness while making high-stress, high-consequence decisions.

Dr. Gasaway has earned the Certified Speaking Professional designation the highest honor awarded by the National Speakers Association. His high-energy, humor filled presentations are chocked full of valuable, actionable takeaways – as proven by his 2,500+ program and keynote address invitations throughout the United States, Canada, the United Kingdom, Hong Kong and Australia.

Dr. Gasaway is a big proponent of "Paying it forward" and gives back by serving as the Chancellor for the International Society of Fire Service Instructors (ISFSI) credentialing program and a peer evaluator for the Center for Public Safety Excellence (CPSE) Credentialing program.

When he is not spreading the situational awareness message, he enjoys spending time with his wife, Carol, and his four children: Cameron (a Madison, WI firefighter), Jordan and Hanna (college students) and Micah, (a high school student).

MEETINGS & ACTIVITIES

T-Shirts, Hats, & Raffle Tickets

The non-profit Arizona State Fire Training Committee will be selling Fire School t-shirts, hats and raffle tickets to raise funds to support scholarship programs and statewide fire service training. Items for sale will be available in the lobby of the Mesa Convention Center. Be sure to purchase these items early, before they sell out!

Fire Apparatus Display & Custom Car Show

This family friendly part of Fire School was started back in 1987 with impromptu fire apparatus displays. NOW, from this humble beginning, the Show and Shine has grown to be the centerpiece of the family get-together. Shiny, but hard working, fire engines, ladder trucks, and special duty trucks will all be displayed. There will be refreshments available for purchase, and other activities for

the family. This **free event** will run from **6:00 - 10:00 pm on Friday, September 9th near the Hotel / Convention Center. Bring the whole family!!** Anyone interested in displaying a car or apparatus should contact Chief Mark Nichols at 602-809-2068 or mark.nichols@dmfd.org

Raffle

The non-profit Arizona State Fire Training Committee will hold a fund raising raffle at **6:00 pm on Saturday, September 10th** in Ballroom D of the Phoenix Marriott Mesa Hotel. Items will be raffled to benefit the Training Committee's scholarship program and other activities. This is a fun, fast-paced raffle and everyone is welcome to attend. Ticket holders must be present to win.

WIN a chance to own this Silverado at our annual Saturday Raffle!!!!!!

CHEVROLET CHAPMAN
1717

Get your plate at:
<https://servicearizona.com/webapp/vehicle/plates/viewPlateSelection.do?plateChoice=200>

ARIZONA HLP US Support Firefighter Training

16

The image is a promotional advertisement for a raffle. It features a red Chevrolet Silverado truck parked on a grassy area. To the right of the truck is a large sign for Chevrolet Chapman, with the Chevrolet bowtie logo and the name 'CHEVROLET CHAPMAN' in white letters on a blue background. Below the sign is the number '1717'. In the foreground, there is a close-up of an Arizona license plate with the text 'HLP US' and 'Support Firefighter Training'. The license plate also includes 'ARIZONA' at the top and '16' in the bottom right corner. A line points from the license plate to the truck. The background shows a building and palm trees under a clear sky.

GENERAL INFORMATION

WHEN DOES REGISTRATION END

Registration for workshops ends on August 26th. You will not be able to register after this date!

HOW DO I FIND A CLASS & REGISTER

Registering for Fire School is a simple process. Follow the registration link from the fire school website:

www.azfireschool.org

Use your email address to begin the registration process.

CAN I CHANGE MY CLASS

Yes. Once you have completed the registration process you may return at any time to make a class change or add merchandise items. However all registrations are final and no changes will be permitted after August 26th.

WHAT IF THE CLASS I WANT IS FULL

If the workshop you select is not available because enrollment is at the maximum, please select another workshop. **Workshops are filled on a first come, first served basis**—register early to get the workshop you want.

You may also elect to be added to the waitlist for a particular workshop. If you wish to be added to the wait list please contact Melina Joya at 623-333-6501. If a space becomes available for that class you will be contacted.

SUBSTITUTIONS/ CANCELLATIONS

Contact Melina Joya by email at melina.joya@azcfse.org or by phone at 623-333-6501 to make a substitution, or cancellation.

REFUND POLICY

All requests for refunds must be made in writing by contacting: Melina Joya by email at melina.joya@azcfse.org. Written requests for registration cancellation refunds for any reason must be received **on or before August 26th**. **No refunds will be given to “No Shows”.** **No refunds will be issued for enrollments cancelled after August 26th.**

PREREQUISITES

Some workshops require a prerequisite. Please check each workshop description for any required prerequisites. Registrations will not be accepted unless the attendee confirms on the registration form that he/she meets the prerequisites for the class.

ATTENDANCE

Attendance at all sessions of your workshop is required. At the conclusion of each workshop, participants will receive a Certificate of Completion. Certificates of Completion will only be presented to participants that complete all academic and attendance requirements.

SAFETY STATEMENT

All Fire School participants are expected to present themselves for class and field activities in a manner consistent with the workplace expectations of the Fire Service. When in the opinion of a course Instructor or Coordinator a participant appears, for any reason to be impaired, appropriate actions will be taken, up to dismissal from the Arizona State Fire School.

DRESS CODE

It is each student's responsibility to use good judgment in selecting attire that projects a professional image while remaining appropriate for climate differences and safety in class activities. The State Fire School staff have the authority to make a determination that a participant's attire may be inappropriate.

CODE OF CONDUCT

The lifesaving work emergency service personnel perform every day has earned the respect and admiration of the general public. This reputation and respect can be threatened by the careless or thoughtless actions of a very few. Your actions reflect not only upon you as an individual, but upon the emergency service profession as a whole. The public expects our actions to be above reproach, on and off the emergency scene. As representatives of emergency service agencies, participants are expected to demonstrate the highest professional standards in their dress, demeanor and behavior while attending the State Fire School.

AGE DISCLAIMER

Individuals under the age of 18 may not participate in the Fire School. Contact the State Fire Training Committee if more information is required.

LIABILITY & INJURY INFORMATION

The State Fire School will provide instruction in courses that the participant selects under the supervision of competent instructors. Some of the courses involve “hands-on” training that may subject participants to risk of injury. In consideration of being permitted to enroll in such courses, **each participant acknowledges that he or she is aware of the risks associated with participation in such courses and is voluntarily agreeing to assume such risks.** All students attend Fire School as an employee or volunteer of the sponsoring agency or company indicated on their course registration form. **A sponsoring agency or company is required to provide worker's compensation insurance coverage to participants for all Fire School activities.** The agency Chief or company supervisor indicated by the student will be notified of the student's enrollment as a representative of that agency or company.

SCHOLARSHIPS

This is a reimbursement scholarship! \$500.00 for each pair of students. Scholarships will only be awarded in pairs – no exceptions. Reimbursement checks will be presented, after required class completion, to department representatives on the last day of Fire School.

The awards will be prioritized as follows:

1st - Volunteer Departments

2nd - Departments with less than 6 paid firefighters

3rd - Departments with less than 20 firefighters and have had a significant reduction in their training budget

4th - Other departments that can justify training needs that cannot be met with their internal budget – each will be reviewed and considered

All requests that meet the above requirements will be considered. Early requests are recommended. Scholarships are awarded daily.

Please submit a scholarship application as soon as possible to:
Randyredmond@hotmail.com

WHERE ARE THE WORKSHOPS HELD

Most of the workshops are located at the Mesa Convention Center and the Phoenix Marriott Mesa Hotel located next to the Convention Center at 200 N. Centennial Way in downtown Mesa. Some of the workshops will be held at offsite locations. **All participants are required to check-in prior to attending class** in the lobby of the Mesa Convention Center (see the Fire School Schedule of Events for check-in times). Upon check-in, students will be able to confirm the workshop they have registered for and will receive Fire School and location information for their class.

OFF-SITE WORKSHOP LOCATIONS

Not all workshops are held at the Phoenix Marriott Mesa Hotel and Mesa Convention Center. Please check descriptions for the specific location of your workshop. **Off-site workshop participants must attend the Opening Ceremonies for specific location information.** Participants are responsible for transportation to off-site locations.

REGISTRATION

Fire School information and registration link are available online at:
www.azfireschool.org

PRE-REGISTRATION REQUIREMENTS

Before registering for Fire School each participant MUST have a personal or department e-mail address and an ERMA ID number. Your email address is used to create your Fire School registration record.

Registration ends August 26th at 5:00 pm.

Preregistration for Fire School is required. **Registration is not accepted at Fire School.** The State Fire Training Committee reserves the right to limit the

number of participants from one department in the same workshop.

Most workshops are 24 hours in length and all are presented simultaneously over the fire school's four days. Participation is limited to a single workshop.

ERMA ID NUMBER

AzCFSE participates in the Event Registration and Management Application (ERMA) System for record keeping purposes. All students registering for Fire School must have or must obtain an ERMA identification number. If you do not currently have an ERMA ID number you may obtain one by registering at www.erma.az.gov.

ENROLLING & MAKING PAYMENT

To enroll, you must have a credit or debit card with a **Visa**®, **MasterCard**®, **Discover**®, or **American Express**® logo. Enrollments will only be accepted if a payment is processed at the time of enrollment. **Checks will not be accepted.** Registration will not be complete without payment. If payment is not processed at the time of enrollment your course selection will not be processed.

WORKSHOP FEES

All workshops are **\$125.00** plus a registration processing fee EXCEPT those workshops which include lab fees, book fees or certification testing fees (see class description for more information).

WHERE TO STAY AT FIRE SCHOOL

The host hotel for Fire School is the Phoenix Marriott Mesa Hotel adjacent to the Mesa Convention Center. Individuals are responsible for making their own hotel reservations. Reservations should be made as early as possible because the hotel fills quickly. Dining facilities are available on the grounds of the host hotel and in the surrounding community.

Host Hotel:
Phoenix Marriott Mesa Hotel
200 N. Centennial Way
Mesa, Arizona 85201

Conference Rate:
\$34 + tax

Phone:
(800) 266-9432 or 480-898-8300

Online Registration Link:
<https://resweb.passkey.com/go/2016AZFIRE>

Reservations must be made by August 10th to receive the Fire School group rate, based on availability.

Breakfast Coupons will also be available for purchase for \$8 per person/per coupon when making reservations.

GETTING STARTED AT FIRE SCHOOL

Participants must check in at the Fire School Information Desk, located in the lobby of the Mesa Community Center, on Wednesday, September 7th, from 2-5 pm or on Thursday, September 8th, from 7-8:30 am Upon checking in, students will receive Fire School information.

All participants must attend the Opening Ceremonies at 9:00 am on Thursday, September 8th.

The Opening Ceremonies will be held at the Mesa Convention Center in the Main Hall. *The Opening Ceremonies mark the beginning of Fire School and provide important workshop information to participants.*

16 FIREFIGHTER LIFE SAFETY INITIATIVES

Initiative 1: Define and advocate the need for a cultural change within the fire service relating to safety, incorporating leadership, management, supervision, accountability and personal responsibility.

Initiative 2: Enhance the personal and organizational accountability for health and safety throughout the fire service.

Initiative 3: Focus greater attention on the integration of risk management with incident management at all levels, including strategic, tactical, and planning responsibilities.

Initiative 4: Empower all firefighters to stop unsafe practices.

Initiative 5: Develop and implement national standards for training, qualifications, and certification (including regular recertification) that are equally applicable to all firefighters, based on the duties they are expected to perform.

Initiative 6: Develop and implement national medical and physical fitness standards that are equally applicable to all firefighters, based on the duties they are expected to perform.

Initiative 7: Create a national research agenda and data collection system that relates to the initiatives.

Initiative 8: Utilize available technology wherever it can produce higher levels of health and safety.

Initiative 9: Thoroughly investigate all firefighter fatalities, injuries, and near misses.

Initiative 10: Ensure grant programs support the implementation of safe practices and/or mandate safe practices as an eligibility requirement.

Initiative 11: Develop and champion national standards for emergency response policies and procedures.

Initiative 12: Develop and champion national protocols for response to violent incidents.

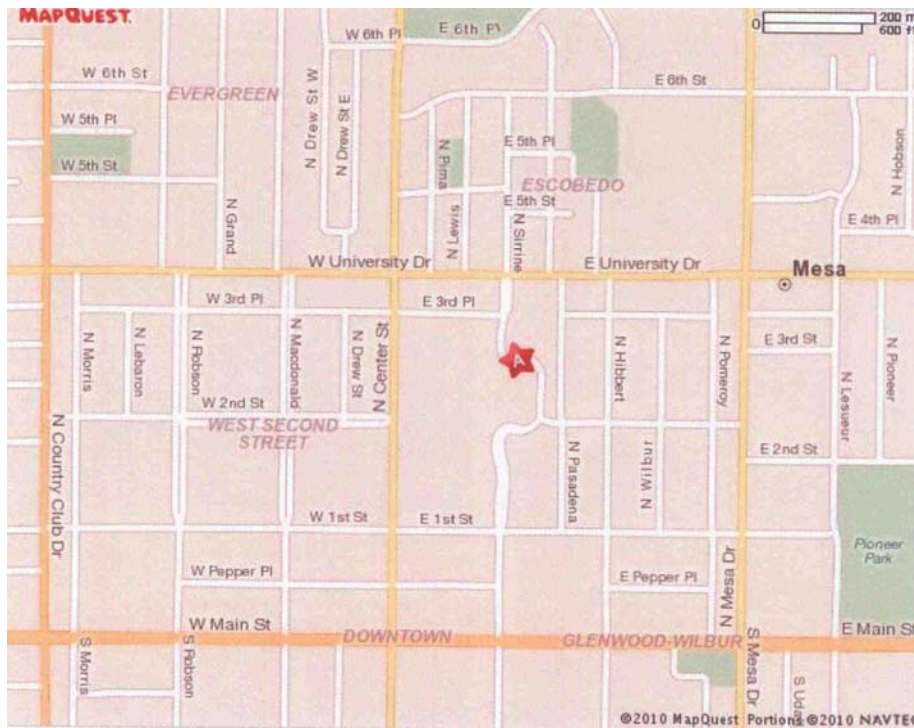

Initiative 13: Provide firefighters and their family's access to counseling and psychological support.

Initiative 14: Provide public education more resources and champion it as a critical fire and life safety program.

Initiative 15: Strengthen advocacy for the enforcement of codes and the installation of home fire sprinklers.

Initiative 16: Make safety be a primary consideration in the design of apparatus and equipment.

DRIVING DIRECTIONS

Host Hotel:
Phoenix Marriott Mesa Hotel
200 N. Centennial Way
Mesa, Arizona 85201

Driving Directions:

From Phoenix Sky Harbor International Airport (approximately 15 minutes):

Take the 202 east to Country Club exit. Turn right (south) and take to University, turn left (east) and go to the first street after Center, which is Centennial Way. Turn right (south), the Hotel is straight ahead.

From Tucson, Arizona

Travel I-10 to US 60. Travel east to the Country Club exit. Go north approximately three miles to Main Street and turn right. Travel 3/4 mile to Centennial Way. Turn left to the Hotel.

From Phoenix, Arizona

Take I-17 south to the I-10 Tucson transition. Follow I-10 east to 202 East. Continue east to Country Club exit, turn south to University Dr, and turn left (east). Travel to the first street after Center, which is Centennial Way, turn right (south). The Hotel is straight ahead.

From Flagstaff, Arizona

Take I-17 south to the I-10 Tucson transition. Follow I-10 east to 202 East. Continue east to Country Club exit, turn south to University Dr, and turn left (east). Travel to the first street after Center which is Centennial Way, turn right (south). The Hotel is straight ahead.

From Scottsdale, Arizona

Go south on Scottsdale Road to University, turn left and go east until you go through the intersection of University and Center. Turn right on the first street after Center, which is Centennial Way, towards the Hotel.
